"There are almost 4400 librarians, support staff, and trustees operating, managing, and administering the 804 public library service outlets in Indiana. This generates payrolls for library staffs which exceed 44 million dollars annually. Much of the money paid to our library employees is cycled back through Indiana's economy."

Definition of Statistical Terms

THE MEAN: **A measure of central tendency which is commonly termed the "average". The *mean* is derived by dividing the sum of all the values in any particular group of data by the values included in that total.**

Example: (see page 51) Total Registered Borrowers (2,512,352) divided by total number of Indiana libraries (239) equals 10,876. So 10,876 is the *average* number of registered borrowers in each of the 239 public libraries.

THE MEDIAN: **The popular term for the 50th percentile. The *median* is equal to the value of an indicator at or below which 50% of the values fall. The value of the *median* differs from the value of the *mean* when the distribution of the values of an indicator is not regular, but rather skewed or piled at either end of the range. When there is considerable difference between the *median* and the *mean*, the *median* is generally thought of as being the more valid measure of central tendency.**

Example: (see page 51) Over half of the 239 public libraries (or at least 119 libraries) have 3353 registered borrowers or less. Since there is a 7523 difference between the *mean* and the *median* in this example, the *median* of 3353 would be considered a "more valid measure of central tendency" of the number of registered borrowers of Indiana's 239 public libraries than the *mean* of 10,876. In other words 119.5 libraries have registered borrowers of 3353 or fewer while 119.5 libraries have more than 3353 registered borrowers.

The staff at the Indiana State Library extend exuberant gratitude to the many individuals in Indiana libraries who contributed to the compilation and reporting of the various statistics in the "Statistics of Indiana Libraries, 1987". For without their commitment and participation, this publication could not be a reality.
